PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience building and integrating high-quality web interfaces. Currently Software Developer at ease.travel, a live travel platform operating in 4 countries, where I translate Figma designs into pixel-perfect, responsive React/Next.js interfaces using Tailwind CSS. Skilled in HTML5, CSS3, JavaScript ES6+, and SEO-friendly front-end architecture. Comfortable working closely with designers and product teams, delivering features autonomously from estimation through QA. Proficient with Vite, Git/GitLab, and Node.js for a full understanding of front/back interactions. Passionate about clean UI, accessibility, and creating interfaces that perform beautifully on any device.

TECHNICAL SKILLS

Core Frontend: HTML5, CSS3/SCSS, JavaScript ES6+, TypeScript, jQuery

Design & UX: Figma (design to code), responsive design, pixel-perfect integration

Build Tools: Vite, Webpack, npm/yarn, Git, GitLab CI, GitHub

State & Data: React Query, Zustand, Redux

Frameworks & UI: React.js, Next.js, Tailwind CSS, Bootstrap, CSS Animations

SEO & Performance: Semantic HTML, Core Web Vitals, meta tags, Lighthouse, SSR/SSG

Backend (awareness): Node.js, Express.js, REST APIs, PostgreSQL, MongoDB

Testing & Monitoring: Jest, Cypress, Sentry

PROFESSIONAL EXPERIENCE

Software Developer | Ease Travel (ease.travel)

Sep 2025 - Present

* Build and maintain the frontend of ease.travel, a live multi-country travel platform (Cameroon, USA, Ivory Coast, Belgium) covering flight search, hotel booking, car rentals, tourism packages, and XAF payment flows.
* Translate Figma mockups into pixel-perfect, fully responsive interfaces using React/Next.js and Tailwind CSS, collaborating daily with the design team to ensure visual and UX consistency.
* Architect and maintain a cohesive Tailwind-based design system (components, tokens, variants) used across all product modules.
* Implement SEO best practices (semantic HTML, SSR/SSG with Next.js, meta tags, Open Graph) that improve product visibility across 4 regional markets.
* Build performance-optimized UIs for African network conditions: lazy loading, code splitting, image optimization, Core Web Vitals monitoring.
* Collaborate with backend and product teams, handling front/back integration via REST APIs and managing state with Zustand and React Query.

Fullstack Developer | Alt+ (Freelance)

Oct 2021 - Nov 2024

* Designed and integrated the full Alt+ web platform frontend: responsive HTML/CSS/JavaScript interfaces built from design specifications.
* Built reusable component libraries in React and implemented Tailwind CSS design tokens for consistent styling across the product.
* Ensured cross-browser compatibility, accessibility (WCAG), and SEO-friendly markup on all delivered pages.
* Collaborated with designers and product managers, translating wireframes and Figma mockups into production-ready interfaces.
* Set up CI/CD pipelines (GitLab CI) for automated front-end build and deployment, reducing release friction.

Web Developer Intern | SCS

May 2021 - Jul 2021

* Contributed to frontend improvements on the company website: HTML5/CSS3 refactoring, JavaScript enhancements, and cross-browser testing.
* Gained hands-on experience with web development standards, SEO-friendly markup, and responsive design techniques.

KEY PROJECTS

Ease Travel -- Multi-Country Platform | **ease.travel** *React / Next.js / Tailwind CSS / Node.js*

* Production platform live in 4 countries: pixel-perfect Figma integration, Tailwind design system, SSR/SSG for SEO, real-time flight search UI, full booking flow, and XAF payment interfaces.

We Travel -- Travel Agency App | **Personal Project** *Next.js / Tailwind / FastAPI (Python)*

* Full frontend for a travel agency: tour packages browsing, customer portal, booking forms, and integrated payment UI.

MERN Blog | **Personal Project** *MongoDB / Express / React / Node.js*

* Complete blog platform: responsive UI, Google authentication, real-time comments, CRUD posts, Redux state management.

Skypey -- Real-time Chat App | **Personal Project** *React / Redux / WebSocket*

* Responsive real-time messaging UI with live notifications, contact management, and smooth WebSocket integration.

EDUCATION

Bachelor's Degree in Computer Science | **IUES / INSAM de Bafoussam** *2020 - 2023*

* Software engineering fundamentals: algorithms, web development, databases, networks, and project management.
